OFFICE OF THE SECRETARY

In the matter of

Replacement of Part 90 by Part 88 to  
Revise the Private Land Mobile Radio  
Services and Modify the Policies  
Governing Them

PR Docket No. 92-235

To: The Commission

COMMENTS OF Security Alarm Co., Inc.

Security Alarm Co. holds FCC radio licenses governed by Part 90 and is therefore an interested party to and files the following comments in, PR Docket No. 92-235. These comments will be directed primarily at the Central Station operations currently authorized under Part 90.75.

Security Alarm Co. has invested considerable time and money to install and operate our Safecom radio system that is manufactured and sold by Senses International of San Jose, California. Our Safecom system is fully UL-Listed for Life-Safety applications and is used to provide security in many high security applications. Safecom uses advanced technology to put up to 2,500 radio units on a single simplex or duplex 12.5 KHz narrowband channel. As a fully supervised two-way system, it need not transmit a message more than once in most cases.

We believe that the Safecom system meets or greatly exceeds the intent of this proceeding with respect to spectrum efficiency and channel loading, and should become the standard by which other alarm radio systems are measured. Security Alarm Co. wishes to go on record as supporting the comments filed by Senses International in this proceeding.

Respectfully submitted,

*Terry E. Blanchett*
